

Manual Cleaning Solution at a nonwoven production

Our esteemed customer, Messrs. Kimberly-Clark s.r.o. CZ, a producer of hygienic products has engaged our expertise for their in-house cleaning problem to be solved. A CVS for manual cleaning was installed and Messrs. Kimberly-Clark confirms that their expectations were fully met. Some areas of concern are shown as follows:

Benefits of manual cleaning

Clean textile machinery is:

- higher productivity and better quality
- reducing second grade material
- increasing productivity (less downtime)
- reducing component wear (requiring less spare part)
- precautionary safeguarding fire hazards

Manual Cleaning Solution at a nonwoven production

With Central Vacuum Systems

- cleaner environment is achieved
(positive effect on employees and productivity)
- the waste is centralized collected and can
be further processed (briquetting, compacting, etc.)
- the waste is collected and not spread as with
compressed-air-blowing

cleaned with CVS
