

Manual Cleaning Solution in Spinning

Facts

- **clean textile machinery is**
 - producing better quality (yarn / fabric) & reducing second grade material (less fly spun into yarn /woven into fabric)
 - increasing production efficiency (less downtime)
 - reducing component wear (requiring less spare parts)
 - extending life-time expectancy
 - less fire hazardous
- **cleaner environment has a positive effect on employee and productivity**
- **the requirement of "frequent machine cleaning" is written in all manuals of spinning machines suppliers**
- **less use of compressed air is saving a lot of electrical energy and keeps your mill clean**

Manual Cleaning Solution in Spinning

Reference Letter from our esteemed customer Iskur Kahramanmaraş (Turkey)

Quote

"Thus with CVS we have solved the logistic problems of waste seizing and transportation... thanks to this situation our machinery efficiency / performance has been increased"

"We believe that the manual cleaning system of waste such as dust, fly and fiber remnants, which is supplied by Steinemann's CVS has proven to be an indispensable solution for all textile mills"

Manual Cleaning Solution in Spinning

Complete Solution with CVS

- ✓ the efficient solution for waste logistics
- ✓ less labor involvement (cleaners) required
logistics are solved
- ✓ waste is centrally collected and can be
further processed (compacting, etc.)
- ✓ More efficient cleaning compared to:
 - using compressed air
(... is not cleaning, but spreading waste from "A" to "B")
 - mobile cleaners with small filters & lower performance
- ✓ small pipe diameters (mostly DN 100, up to maximum
DN 150); easy retro-fitable for existing mills
- ✓ for applications please view our video at
